

Multi-Jack

The Multi-Jack in its minimum configuration has a lifting capacity of 22,000 lbs (10 tons) from a single pipe support beam, and a higher tonnage if additional jacks are added to the lifting pipes.

This pipe rack jack has been purpose-built to lift either single or multiple pipes across a rack easily with minimum installation effort and is a lighter, more versatile device than the Mega-Jack.

Features

- Lift individual or multiple pipes.
- Remote hydraulic lifting.
- Double mechanical lockout when necessary.
- Lift selected pipes on a rack or skip pipes using shims.
- Lifts any diameter pipe.
- Can lift pipes up to 4 inches from a H254 beam, custom lifting configurations can provide greater lifting heights.
- Handling weight is 29 lbs / 13 kg per arm.
- Working Load Limit (WLL) is 22,000 lbs (10 tons) per touchpoint using two jacks, lifts more using additional devices.
