

Uni-Jack MK3 Model Numbers A00931, A00925, A00934)

There are 3 models of the Uni-Jack with the following Working Load Limit (WLL) from a single support beam:

- 8" model number A00931 with a WLL of 3,300 lbs (1.5 ton)
- 6" model number A00925 with a WLL of 2,200 lbs (1.0 ton)
- 4" model number A00934 with a WLL of 1,650 lbs (0.75 ton)

The 8" model can lift all pipes up to 8", as will the other two models up to their respective sizes. Small models must be deployed when the spacing between the adjacent pipes are too narrow for the larger models.

This pipe rack jack has been purpose built to lift individual pipes at critical locations. It is exceptionally light, easy and quick to install.

Features

- Lift individual pipes up to 8" in diameter.
- Remote hydraulic lifting.
- Manual lifting using ratchet spanner.
- Mechanical lockout.
- Can lift pipes up to 6" high from any support type.
- Handling weight is 11 lbs / 5 kg per arm.
- Working Load Limit (WLL) is up to 3,300 lbs (1.5 ton) per touchpoint.
