

Mega-Jack

The Mega-Jack in its minimum configuration has a lifting capacity of 44,000 lbs (20 tons) from a single pipe support beam, and a higher tonnage if additional jacks are added to the lifting pipes.

This pipe rack jack has been purpose-built to lift either single or multiple pipes across a rack easily with minimum installation effort.

Features

- Lift individual or multiple pipes.
- Remote hydraulic lifting (optional).
- Manual lifting using ratchet.
- Double mechanical lockout.
- Lift selected pipes on a rack or skip pipes using shims.
- Lifts any diameter pipe.
- Can lift pipes up to 6 inches from a H254 beam, custom lifting configurations can provide greater clearances.
- Handling weight is 44 lbs per arm.
- Safe max. lifting capacity is 44,000 lbs (20 tons) per touchpoint using two jacks, lifts more using additional devices.
